EDUCATION

University of Manchester

BEng, Electrical & Electronic Engineering - Predicted: First Class (91% Average - Semester 1)

Manchester, UK

Sep 2025 – Jun 2028

Oxford International College

Mathematics (A*), Chemistry (A*), Physics (A), Further Maths (A)

Oxford, UK

Aug 2022 – Jun 2025

WORK EXPERIENCE

TK Partners (Venture Capital)

Incoming Business Analyst Intern

Bangkok, Thailand

Jul 2026 – Sep 2026

- Incoming summer 2026 analyst on the early-stage investment team focusing on health-tech.

AirfoilLearner LTD

Co-Founder

Manchester, UK

Sep 2025 – Present

- Building a deep-tech ML startup, screening computational fluid dynamics designs and selected into UoM Venture Builder cohort 2.
- Led GTM and partnerships, securing £8,000 in early funding and running outreach achieving 221% month-on-month user growth.
- Co-developed the prototype and validated demand through 20+ engineer interviews and a market fit report with an NPS of 35.

WOWS global

Venture Partner & Partnership Intern

Remote

Nov 2025 – Feb 2026

- Researched 40+ early-stage SEA startups and funds from a sourced pipeline, filtering against fund thesis, stage, and sector fit.
- Built multi-year ARR projections off core revenue drivers and benchmarked company valuations against industry multiples.
- Wrote founder and market landscape briefs and reports ahead of partner meetings to assist in deal flow.

National Electronics and Computer Technology Center

Research Trainee

Pathum Thani, Thailand

Jul 2024 – Aug 2024

- Synthesised graphene quantum dots from a plant leaf and used them as a fluorescent sensor to detect heavy metals under UV light.
- Engineered the electrodes and electrolyte for a graphene supercapacitor cell, improving measured capacitance by ~20%.
- Designed an experiment for the terahertz research team and characterised materials using Raman spectroscopy.

QUANTGATES

ML Intern

Remote

Sep 2023 – Jun 2024

- Built a convolutional neural network to detect hotspots on solar panels at 97.2% accuracy, developed for a national tech competition.
- Adapted the model to automate panel inspection, replacing manual thermal checks and cutting projected inspection time by ~80%.
- Prototyped an in-house LLM to route requests and return real-time answers in place of a traditional UI.

LEADERSHIP & ACTIVITIES

AccelerateMe – Growth Associate

Oct 2025 – Present

- Ran hackathons and growth campaigns at the UK's leading student-led accelerator with £390K deployed, £65M+ follow-on.
- Competed and built in hackathons alongside team members who have gone on to Y Combinator and Entrepreneurs First.

Manchester Business Society – Consulting Associate

Oct 2025 - Present

- Ran mock case interviews and prep sessions to ready 15+ peers for consulting recruitment and competed in multiple case competitions.
- Organised and ran consulting case events that drew over 80 students, owning planning, marketing, and live delivery

180DC Manchester - Consultant

Feb 2026 – May 2026

- Led the internal-communications workstream for an Ecuador-based housing NGO (CAEMBA Youth) scaling across multiple schools.
- Diagnosed the coordination problems through staff surveys and recommended clearer roles to fix how the 7 schools work together.

EMEA Strategy Consulting Summit - Runner-up (60+ teams)

Feb 2026 – March 2026

- Pitched directly to Deliveroo executives on student plan rollout, modelling the financials and profitability behind a £2.49/month tier.
- Stress-tested the strategy across different demand cases, proving it could capture the untapped student market profitably.

Shade Tree Fund - Team Prysmian

Feb 2026 – March 2026

- Pitched a Buy on Prysmian with the electrification and grid-expansion super cycle narrative, winning a £5,000 allocation to invest.
- Ran a DCF, trading comps, Monte Carlo simulation, and regression forecasting to a €124.80 target price, 28.6% above market.

International Space Settlement Design Competition - Global Runner-up

Jul 2024 - Aug 2024

- Led a 12-person Business & Marketing function within a 60-person company, for a hypothetical space settlement by NASA.
- Built the electrical systems and financial model to keep the settlement profitable, presented under a 48-hour deadline.

SKILLS & INTERESTS

Awards: Regional 1st, UKROC; Mathematical Modelling Competition; 2nd place, AccelerateMe Hackathon; CBS Global Case Comp (Top 15%).

Sports: Competitive tennis player, bodybuilder with experience in personal training.

Languages: English (fluent), Thai (native).

Computer skills: Excel, Financial modelling, PowerPoint, Python, TensorFlow.

Interests: Macro/FX research (passed FTMO challenge), systematic trading, investing, AI, macroeconomics, start-up accelerators.
